

RAILROAD NEWS
FROM ALL POINTS

Southern Will Turn Many Exposition Pilgrims Through Richmond.

MILITARY MEN PASSING BY

Increased Wages and Enlarged Expenses Cutting Down Profits of the Railways.

The Southern Railway has promulgated its Jamestown Exposition rates from its thousand or more stations in the South. It will sell all kinds of round-trip tickets—tickets good for one season, good for sixty days, for fifteen days, ten days and on every Tuesday of the week tickets called "coach excursion" will be sold. These are very cheap, and will be good to return on within seven days from date of sale to points within a radius of 350 miles of Norfolk. A large percentage of the tickets sold in the Southern's vast territory will give the purchaser the privilege of taking in Richmond without extra charge, and it is certain that that line will turn many pilgrims through this city during the exposition period.

The trains of the Seaboard Air Line passing through this city yesterday and last night were crowded with military men. The soldiers of Columbia, S. C., to attend the convention of the Interstate National Guard Association, which will assemble in the capital of the Palmetto State tomorrow. The soldiers are officers of prominence, both of the United States Army and the militia of various States, otherwise known as the National Guard. Last night many Connecticut, New York, New Jersey and Delaware officers passed through.

Railroad earnings throughout the country continue to show disappointing results. Business continues of very large volume—larger, in fact, than the roads can handle—but expenses since the first of the year have increased out of all proportion to the increase in gross. If no improvement be shown, as the year advances it is beyond doubt that more than one road will be compelled to reduce its disbursements to stockholders, to say nothing of its expenditures for extensions and improvements.

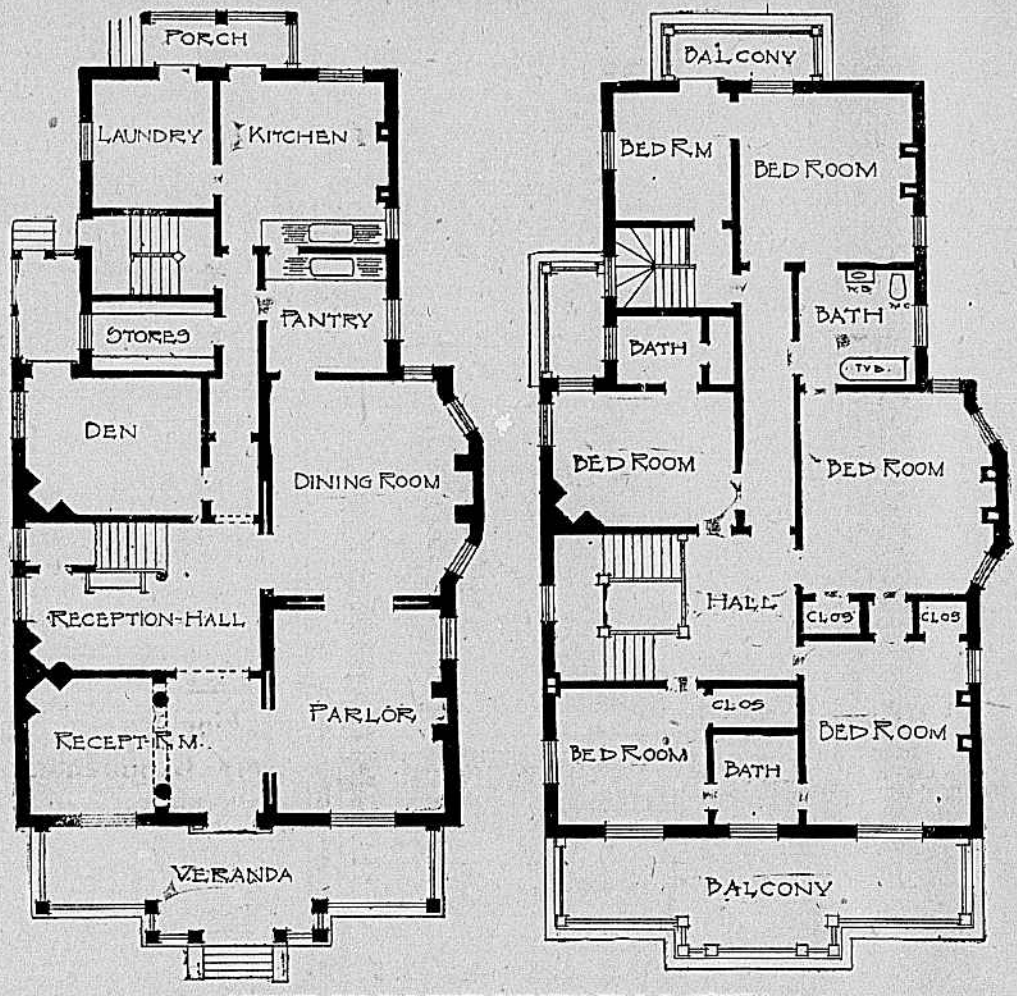

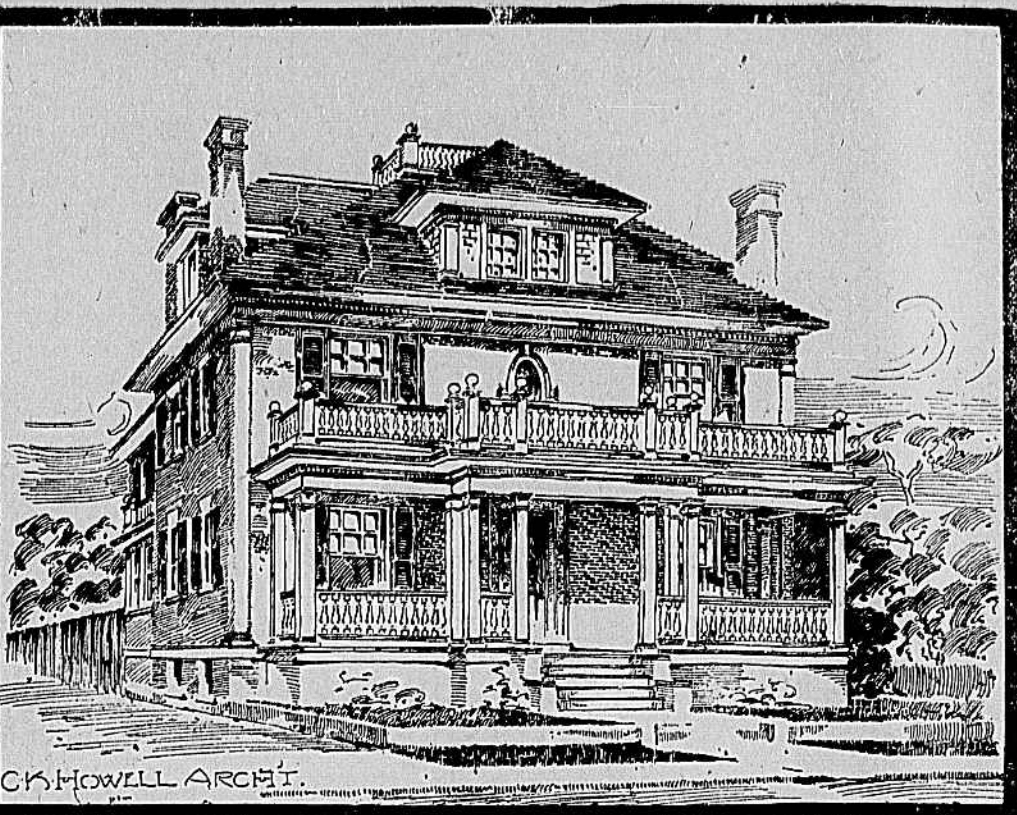

A halt has been called on the two-cent rate in Mississippi. Judge Niles, of the Federal Court, has issued a temporary injunction, on petition of the Louisville and Nashville Railroad Company, restraining the Mississippi Railroad Commission from enforcing the order establishing a two-cent passenger rate on the interchangeable mileage basis, according to a recent act of the Legislature.

The Eastern Illinois Railroad, which had contemplated vast extensions this year, has cut down its work. The plans have just been changed so that instead of buying 150,000 tons of steel rails this year the company will buy but 9,000 tons. This is in the line of general retrenchment thought necessary on account of hostile legislation.

KLEVASAHL SAYS
PLENTY OF FRUIT

Mr. W. A. Klevasahl, a well-known local weather sharp, in discussing the unusual warm spell, said that his observations during the past few days were that the spring and summer would be the best for humanity in six years. "I have noticed recently that the sap of trees is flowing upward, and that the leaves are beginning to bud. This means that there will be little forward fruit, and that the few cool days which we may expect next week will not be of sufficient severity or duration to injure vegetation. There will be no frost to kill the peach crop, and the season will be great for berries."

Pretty Colonial House for Lee District

DESIGNED FOR THE TIMES-DISPATCH BY C. K. HOWELL.

The illustration shown presents the residence of Mr. Garnett Tabb, to be erected on Allen and Monument Avenues, opposite the Lee Monument. The building, as shown, is to be of the Colonial style, of good detail. The attractive features will be the broad veranda at the front, and the side porch off of the den. The superstructure will be constructed of red sand stock brick, laid in white mortar. The trimmings, which will be of wood, will be painted white.

The roof covered with slate. Dimensions: front, 38 feet; side, 72 feet; exclusive of porch. The hall is a central one, and is trimmed with quartered oak and finished with a dark Flemish color; the fireplaces with a hearth and facings of teapole tile and a mantel of oak. The dining-room is trimmed in popular and treated with white enamel; the fireplace with the hearth and facings and a mantel. The bedrooms are fitted complete, and the kitchen is furnished with range, sink, dresser, etc. There is a large room off the kitchen, to be used as laundry or servants' hall. The second floor is trimmed with poplar and treated with white enamel. It contains five bedrooms, sewing room, linen closet, seven closets and three bathrooms, the latter wainscoted and paved with white enamel tiling, and furnished with porcelain fixtures and exposed nickel-plated plumbing. There are two servants' bedrooms, with bath and trunk room, on third floor. The basement is furnished with furnace room, fuel room and cold storage, and to be heated with hot water throughout, and will be furnished with all modern conveniences.

CHIMNEYS. I will not mortize on the evils of smoky chimneys, but just tell you in plain language how to construct them so they will not smoke. Make the throat of the fireplace not more than half the size of the flue, carefully smooth the inside of the flue, and have it of the same area all the way to near the top of the chimney, where it should be gradually tapered inward to about half the area of the flue. At the extreme top the capstone should slant from the opening in all directions downward at an angle of about twenty degrees. This will insure a good draught and prevent the smoke blowing downward. No two fireplaces should enter the same flue; neither should a stovepipe enter a flue unless the fireplace is closed. Each stove and fireplace should have its own flue. The size necessary for a flue depends on the fuel to be used. Soft or bituminous coal requires a flue nearly double the size of one where anthracite is to be used; an open fireplace for wood requires a flue twice the above. For instance, an eight by eight inch flue answers for anthracite, because it makes but little soot, while if bituminous coal is used, eight by twelve is none too large. You will find in houses all over the country flues smaller than the above, and a corresponding number of smoky chimneys, which it is impossible to remedy without rebuilding from the bottom up. The carelessness displayed in chimney

COPPER PAYS BETTER THAN GOLD

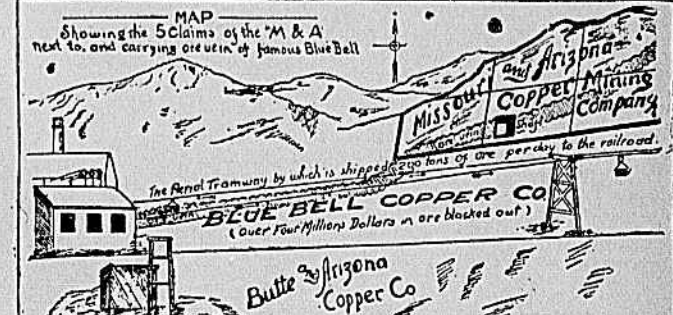

Copper Mad

The world is copper mad. So universal has become the use of this metal that the demand exceeds the supply. It is not a question of price but, "we must have copper at any price" is the frantic cry.

An ownership of a copper mine means an income for your life and for your family after you are gone. You can buy stock for 10c per share in an extension of one of the biggest copper mines in Arizona.

The Blue Bell is second only to the United Verde in copper production in the country and is producing 200 tons per day. Adjoining this famous mine is the Missouri and Arizona Copper Mining Company which has a shaft sunk to a depth that copper sulphides have been reached. The results of the development of this property are equal to those of the Blue Bell at the same depth. The investment offered you in the purchase of this company's stock is an opportunity which you will do well to investigate. Write the secretary of the company for full particulars which will be mailed you free.

The mining engineer who made a most thorough examination of this property, had entire charge for seven years of the development of the Blue Bell. He is E. A. Haggott, E. M., of the well known Haggott, Grand, Smith Co., Consulting Engineers, Prescott, Arizona; a director in a bank and prominent citizen of that city, read the following extracts from his report on the property of the Missouri and Arizona Copper Mining Co.

EXTRACTS FROM ENGINEER HAGGOTT'S REPORT
"The main vein of the Blue Bell extends into and through the M. & A. claims as may be plainly seen by tracing it on the surface. * * * In the shaft on the M. & A. the sulphide ore began to appear at a depth of 36 feet. * * * The sulphide ore shows a value of .1 oz. gold; .14 oz. silver and 4 1/2% copper per ton. * * * As pay ore was opened by me on the Blue Bell at a depth of 100 feet, the same condition will undoubtedly obtain on the M. & A. Group which carries the same vein."

"MISSOURI AND ARIZONA" REPRESENTS

- A Big Mine—100 Acres,
- A Small Capitalization,
- A Superb Location,
- A Sound Treasury,
- A Guaranteed Fund for Development,
- A Business Board of Directors,

construction is astonishing. As the work is laid from view, completion will be witnessed during the process of construction from the ground up. All chimneys should, if possible, extend above the apex or comb of the roof, and should be built of good, hard-burnt brick, laid in cement mortar above the roof, and no woodwork should be allowed to enter within five inches of the inside of the flue, and not within twelve inches anywhere near the fireplace.

NOTES FROM AFAR.

Items of Industrial Interest from All Parts of World.

A newspaper statement from Ottawa to the effect that twenty-seven Canadian Boards of Trade have united in a memorial to the government urging the deepening from 14 to 20 feet, also the widening of the Welland Canal, connecting Lakes Erie and Ontario. The present canal is said to cost the Dominion over \$26,000,000.

A new regulation in Victoria, Australia, makes it an offense for a substance to be sold in that State as a disinfectant unless it will, when used as directed, kill the germs of disease, and explicit directions for use must appear on each bottle or wrapper. The total imports of disinfectants into the Commonwealth of Australia amounts to about \$250,000 per annum.

A Reuter's telegram from Bucharest states that the Roumanian minister of finance will shortly submit to Parliament his report on the budget for 1907-'08. The report points out that last year's surplus of \$355,000 was due to the harvest being above the average, and also to the uninterrupted development of the economic life of the country. Roumanian's finances, the report adds, are in a flourishing state.

The foreign trade of Spain, according to unofficial returns, was in 1906 as follows: Imports, \$170,077,000, an increase on the preceding year of \$13,730,000; exports, \$196,677,600, a decrease from the preceding year of \$4,605,000. The imports of the United States from Spain for the calendar year 1906 amounted to \$11,442,000, an increase of \$1,925,000 on 1905, and exports amounted to \$20,553,400, an increase of \$4,284,400 on 1905.

VIRGINIA GENIUS.

Patents Recently Issued to Virginia People.
[Special to The Times-Dispatch.]
WASHINGTON, D. C., March 23.—Messrs. Davis & Davis, Washington patent attorneys, report the grant, this week, to citizens of this State, of the following patents:
P. R. Burkholder, Fishersville, Va., mold.
William E. Gray, Vinton, air compressor.
George C. Hoholm, Norfolk, medicine spoon.
George W. Phillips, Buena Vista, steam boiler furnace.
John J. Westbrook, Danville, safety device for elevators.
James A. Mobano, South Boston, socket for incandescent electric lamps.

New Virginia Concerns.

- The Corporation Commission has issued the following charters:
Northampton Agricultural Fair Association (Inc.), Cape Charles; G. F. Floyd, president; Bridgetown; O. F. Moore, treasurer; Eastville; John T. Wilkins, third; J. L. Haley, W. L. Dalby. Capital stock, maximum, \$15,000; minimum, \$5,000.
American Manufacturing Corporation, Norfolk; C. C. Benjamin, president and treasurer; D. M. Agoy, secretary; T. D. Savage—all of Norfolk. Capital, maximum, \$15,000; minimum, \$1,000.
Stratford Court Corporation, Norfolk; C. H. Wilkins, president; A. F. Roux, vice-president; C. C. Walton, Jr., secretary and treasurer—all of Norfolk. Capital, maximum, \$15,000; minimum, \$7,500. Object: Real estate business.
Window Washing Device Co. (Inc.), Rosslyn; W. G. Himrod, president; H. F. Seamark, vice-president; A. E. Cox, secretary and treasurer—all of Washington, D. C. Capital, maximum, \$25,000; minimum, \$5,000. Object: Patent business.
American Mercantile Company (Inc.), Roanoke; J. C. Cassell, president; H. C. Ellis, secretary and treasurer; W. A. E. King, attorney-at-law—all of Roanoke. Capital, maximum, \$75,000; minimum, \$25,000. Object: Mercantile business.
